Hanging Scales

The 820 Series has an 8" dial, a 20-lb capacity (10-lb x 1-oz dial, 2 revolutions), and the ability to be as flexible in its configuration as you require. It can be made single or double faced, with or without glass, and comes complete with your choice of a variety of attachments.

The 1030 Series has a 10" dial, and can be made in 30- or 60-lb capacities. It too has multiple configurations, including single or double-faced and an array of attachments.

While both the 820 and 1030 Series Hanging Scales are made to strict standards and do pass most local Weights and Measure inspections, they are sold as approximating scales only.

Model	Capacity	Face	Options
820	20 lbs.	10 lbs	G,DD
1030	30 lbs.	10 lbs	DD
1060	60 lbs.	20 lbs	DD

Options: DD = Double Dial, G = With Glass
